The Company would like to provide the explanation on the changes of the Profit and Loss Statement for the second quarter ended 30 June 2021 as follows;

1. The revenue from construction and other revenues

The revenues from construction for three-month period is Baht 3.27 million which decreases in the amount of Baht 16.85 million or 83.74% and for six-month period, the revenues from construction is Baht 6.93 million which decreases in the amount of Baht 40.39 million or 85.36% when compared to the same period of the year 2020. It is because the Company has current revenues from the only one construction project. And because of the situation of the COVID-19 outbreak, the employer ordered the Company to temporarily suspend the construction since mid-April 2021 onwards. In addition, the government has ordered to suspend the construction works to prevent epidemic and safety. Therefore, the revenue recognition did not meet the Company's plan. The Company has other revenues for three-month period in the amount of Baht 0.33 million, which decreases in the amount of Baht 2.22 million and for six-month period is in the amount of Baht 3.70 million, which increases in the amount of Baht 1.03 million when compared to the year 2020.

2. Cost of construction

Cost of construction for three-month period and six-month period is in the amount of Baht 3.47 million and Baht 6.98 million, respectively, which decreases in the amount of Baht 10.52 million or 75.20% and Baht 33.68 million or 82.84%, respectively when compared to the same period of the year 2020. This is because the Company has only one construction project in progress in year 2021. The cost of this project is consistent with the income.

The Company has recently implemented a policy to carefully consider in bidding and accepting construction work to be consistent with the situation of the COVID-19 outbreak and comply with the government's order to temporarily suspend the construction works. As the Company has only one construction project at present and several projects that the Company has participated in bidding have been postponed, the Company can reduce the risks from the burden of labor costs and other construction expenditures.
